

NEXT LEVEL TECHNOLOGY FEATURES & BENEFITS

The industry's most innovative technology, taking your laundromat to the next level.

COMPASS PRO

With 20 available languages and dual language display, Compass Pro is our classic revenue generator that keeps customers coming back week-after-week.

The one-knob design of Compass Pro allows users to quickly scroll and select the wash programs and options that are best for them.

Dual language display is great for stores in diverse neighborhoods, and with 25 customizable programs, owners can generate more revenue while catering to their unique customer base.

CLARUS VIBE*

With a 7" HD color touchscreen display, 35 languages, and 192 customizable wash programs, Clarus Vibe is more than a control panel.

Our intuitive interface allows all of your customers to easily find the right program for their wash load.

The attractive appearance and seamless experience of Clarus Vibe helps your store gain and retain a loyal customer base. And endless programmability gives owners the opportunity to generate more revenue with each wash.

FRONT SOAP DISPENSER*

Our front-mounted soap dispenser is positioned for easy access and tilts down when opened so customers can clearly see each color-coded compartment.

Our user-friendly soap dispenser makes it easy for customers to add the right amount of detergent in the right compartment.

Our front soap dispenser is one more feature that takes Electrolux Professional washers beyond the competition, providing greater accessibility on our large-capacity washers.

AUTOMATIC SAVINGS

Automatic Savings weighs each load of laundry and introduces the precise volume of water needed for the perfect wash – cutting water bills by up to 50%.

Using only the precise volume of water needed increases mechanical action in the drum for a more powerful clean.

92% of washes in US laundromats are underloaded. Without AS, you would be using and paying for unnecessary water in almost every wash. AS helps your store save on utilities and give eco-conscious customers a greener clean.

ULTRA FLAT DRAIN VALVE

Our slimline drain valve saves 97% in dead water versus our competitors.

With a lower volume of water needed to fill the washer, customers get even shorter cycle times.

Save 1 ½ gallons of dead water every wash. That adds up to tens of thousands of gallons saved by the average laundromat annually. Profits stay in your business rather than being washed down the drain.

HIGH SPIN

Our 450 G-force lightning extraction speed is the fastest achieved by any coin washer available today.

More water extracted in the washer means less soap residue, cleaner clothes and faster dry time. Customers can wash and dry in just 45 minutes.

Rise above the competition with the fastest wash in town while you profit from greater customer throughput on your busiest days and lower utility costs year-round.

POWER BALANCE

While other washers drop extraction speeds when an unbalanced load is registered, our unique balancing technology allows our washers to achieve their highest extraction with even the most challenging loads.

Thanks to Power Balance, your customers can trust that they will get all the benefits of high spin with every wash. Shorter dry times with no wet towels and other heavy items.

The lifespan of a washer is negatively correlated with the amount of unbalance it is exposed to. Power Balance protects your investment without sacrificing performance and the amazing profit-generating benefits of high spin washers.

REVERSE DRY

Advanced reversing cylinders prevent balling and wet spots, reducing dry times, cutting energy costs, and ensuring garments are dried evenly.

Clothes are dried evenly with no balling or tangling and no wet spots common on bulky items like duvets, large towels, or curtains.

Shorter dry times help you increase throughput and earning potential on your busiest days. You'll also cut energy costs by up to 25%

ECOPOWER

Our smart technology automatically lowers the temperature in the drum when garments are dry.

Clothes are perfectly dried with less wrinkles and without the wear-and-tear caused by overexposure to heat.

Offer a better service to your customers and reduce your energy costs by a further 15%.

DISCOVER NEXT LEVEL LAUNDRY

Our proven solution to increase your laundromat's profits by hundreds of thousands over the life of your equipment.

Proudly Canadian. Family owned and operated since 1995.
